THE GRAIN TRADE OF BUFFALO.

We copy the tables given below from the *Commercial Advertiser's* Annual Statement of the Trade and Commerce of Buffalo for the year 1858. The first table shows the total movement of grain (flour reduced to wheat) out of the west for the year 1858, and the one immediately following it the per centage of receipts of the total movement at each of the points named for three years:

STATEMENT showing the total movement of Grain, eastward bound, the receipts at Buffalo, and their per centage of the whole movement for three years:

	Total movement out of West.	*Receipts at Buffalo.*	*Buffalo per centage of Tot'l movem't.*
1856	bu 57,707,769	26,239,791	45.5
1857	bu 44,789,851	20,052,689	44.8
1858	bu 59,872,566	28,219,355	47.1

To place in a succinct and intelligible form the *relative* importance of the different points receiving flour and grain form the Lake Region, we append the following:

ANALYTICAL TABLE, showing the per centage of Flour and Grain arriving at each of the principal receiving points, for three years, of all the grain moving Eastward in 1856, 1857, and 1858. Each point received the per centage set opposite its name:

Locality.	1856.	1857.	1858.
Buffalo	45.5	44.8	47.1
Oswego	23.5	18.3	19.2
Montreal	10.6	11.8	9.2
West. Ter. B. & O. RR	4.6	5.3	6.5
Ogdensburgh	4.7	5.9	6.
West. Ter. Pa. C. RR	2.5	4.3	4.3

Cape Vincent	1.6	1.9	1.8
Rochester	--	--	$\frac{5}{}$
	100.0	100.0	100.0

The following is a comparative exhibit of the receipts of grain at Buffalo, Chicago, St. Louis and Cincinnati, in 1858:

Buffalo.		*Chicago.*	
Wh't in flour, bu	8,072,600	Wh't in flour, bu	2,610,685
Wheat	10,735,909	Wheat	9,639,614
Corn	6,621,668	Corn	8,252,641
Oats	2,275,241	Oats	2,313,597
Rye	125,214	Rye	71,012
Barley	389,223	Barley	413,812
	28,219,855		23,301,361

St. Louis.		*Cincinnati.*	
Wh't in flour, bu	1,861,196	Wh't in flour, bu	3,166,590
Wheat	3,835,759	Wheat	1,211,543
Corn	900,000	Corn	1,000,236
Oats	1,690,562	Oats	588,950
Rye	46,198	Rye	64,358
Barley	406,000	Barley	400,967
	8,739,715		6,532,644

Buffalo, in 1858, is thus shown to have received 4,918,494 bushels of grain more than Chicago, and 12,947,486 bushels more than the receipts at St. Louis and Cincinnati combined.

MANUFACTURES.

Buffalo is admirably situated for developing an immense manufacturing interest, and large as is the capital invested in industrial pursuits, we are surprised that it is not double or treble its present amount. Accessible from all points, with unlimited control of transportation facilities, raw material can be brought hither cheaply, and in any quantity. The Lakes and Railroads westward and southward, the Canals eastward and northward, the Canadian market at our very doors, afford extraordinary facilities for the sale, shipment and diffusion of manufactured articles. Buffalo is the most accessible point for the copper and iron of Lake Superior, and the lead of Illinois, near to and with abundance of coal. During the present year it is almost absolutely certain that we shall have direct communication with the coal beds of Pennsylvania, which will materially decrease the cost of iron and other metal working, and prove more or less beneficial to all branches of mechanics. With the advantages of direct communication with the coal deposits, only eighty miles distant, the iron, copper and lead ores will inevitably tend to this point.

It will be seen by reference to any map that the central, accessible position of the city gives it the command of all markets for the purchase of material or the sale of mechanical productions. Then, too, the comparative cheapness of rents and property; the moderate wages, consequent upon cheap living for the operatives; the extreme salubrity of the climate, by which the workman retains his vigor and strength, and the capitalist obtains more labor for his money than he could almost anywhere else; the educational advantages, rendering the city a desirable residence for both capitalist and operative—all combine to render it a most admirable point for investment in manufacturing. Our iron interests are already large, and destined to be immense. An iron smelting furnace is already demanded. The Lake Superior ore can be laid down as cheaply at Buffalo as at any Lake port, the coal is lower here, and the limestone for the flux underlies the whole region. Ore, coal and limestone are nowhere found together, and this region presents as many or more advantages than many a larger iron-working locality.

Our foundries and rolling mills would afford an extensive home market for the pigs produced, and we expect to see smelting furnaces established *ere* long. There is no reason why Buffalo should not be the leading manufacturing town on the continent, as she is the acknowledged chief grain mart. If capitalists will investigate the matter, they cannot but recognize the surpassing position of the city, and the inducements to invest in industrial operations. It is useless to urge the importance of manufactures to the real, material progress of a community. It is a subject as well understood and acknowledged by intelligent persons, that it is supererogatory to advance arguments to prove that the truest wealth is the sterling value given to comparatively valueless material by the hands of labor, affording employment and the prospect of ultimate competence to the operative, thereby attract-

ing an industrious population, and conserving the best interests of the community.

During the year 1858, while the manufacturing interests of the whole country were sunk beneath, or struggling to free themselves from the ruin of 1857, those of Buffalo were not seriously affected. Nearly all were worked during the entire season, and though not doing so much as in 1856 and the former part of 1857, nevertheless accomplished a very respectable year's business. The value of manufactured articles in 1856 was estimated to be $11,500,000, and in 1857, $10,000,000. The value of the work turned out in 1858 was hardly less than that of the year preceding. During 1858 several new manufactories were added to the list, and the capital invested in manufactories in this city is estimated at not less than $10,000,000.

This is the great depot for agricultural machines, five large works being now in operation. The leather interest is also very heavy—the figures in regard to which appear elsewhere. The milling business is large; while the iron interest is immensely valuable and yearly augmenting. The brewery business, as will be seen, is enormous. Several new breweries have been built, and others are in process of construction.

The following list embraces the principal manufactories in Buffalo:

Ginger Brandy,		

All articles manufactured by us are warranted to keep in any climate, and retain their same delicious flavors. They are highly concentrated, and put up in packages which are suitable and safe to ship to any port in the world. They are now among the principal articles of export, therefore shipped at the lowest rates.

TO THE TRADE.

We tender our sincere thanks to our patrons and friends, for the very liberal patronage heretofore bestowed upon us, and hope by our future exertions, and by continuing to manufacture every article from the purest and best materials, to retain and extend that patronage, and enhance the well-known high reputation of our goods. Our Wine Cellars, in combination, are the most extensive of anything of the kind in the world, containing the pure juice of the finest flavored fruits grown on the Western Continent. We call particular attention to our Native Wines, they being of as fine a flavor, and better than most of the imported.

The benefit to be derived in the use of fresh ripe fruit, is well known to all, and when they cannot be obtained in their original form, they can be had in another—which is, in our Wines, &c. These articles are all prepared respectively in their seasons, from the choicest fruits of their kind, as named on our list—thus producing their full fine flavors with all the original strength and freshness preserved, which we present in the shape of the best and cheapest Wines ever introduced to the American public; the use of which will give health and vigor to both body and mind. Every house-keeper, as well as traveler, should always keep a supply of some of these articles at hand, as they are perfect safeguards, either on sea or land.—Our Wines are all original with ourselves, and we challenge the world for their equal.

☞ All orders or communications will receive prompt attention. All goods shipped from either of our Manufactories, we deliver on board of Boats or Cars, and take receipts of same, cartage free.

PALACE REFRIGERATOR—One Size.

This is the most superb Refrigerator, and the most CONVENIENTLY ARRANGED of any ever got up. There is a large apartment at the top for Ice; hooks in same for Fresh Meats. The Cold Air falls below, and cools the Jar of Butter; then passes into the Provision Chamber, giving it the right temperature to keep Cold Meats, Vegetables, Fruits, Milk, Eggs, Pastry, &c. It is handsomely grained, and is an ornament in any dining Room.

COTTAGE REFRIGERATOR. TWO SIZES.

ICE TOP REFRIGERATOR. THREE SIZES.

CHEST REFRIGERATOR. SIX SIZES.

JEWETT'S FILTERS.

LOVERS OF PURE WATER, GLANCE AT THESE FACTS.—River Water is full of decayed matter, which should be removed before the water is taken into the human stomach. The Slime, Animalculæ, &c., extracted from River or Rain Water, is putrescent, and a chief cause of intestinal diseases in summer. Physicians all agree that River Water is unfit for drinking or cooking purposes, unless properly filtered.

THE RECENT INVENTION OF A CHEAP FILTER, (of prepared Charcoal and other material, assimilating to the actual course of filtration of the earth,) for the purification of Aqueduct Water in cities, by which the impure element is made to assume the properties of Spring or Natural Fountain Water, is an event of universal importance.

When River or Rain Water is passed through the compressed medium of Jewett's Filter, it is restored to the purity of Rock Spring Water.

Having largely increased my manufacturing facilities, I am prepared and fully determined to sell a better article of Refrigerators, and at much less prices, than any other makers. Every article will be warranted to give entire satisfaction.

All orders will receive prompt attention. Manufactured and sold wholesale and retail by

CABINET HARDWARE AND UPHOLSTERY MATERIALS FOR SALE TO THE TRADE.

Having largely increased manufacturing facilities, it is my purpose, by a large increase of business, to sell at a reduction on former Low Prices, while the quality of the work will be maintained as heretofore, unrivaled. Every article sold will therefore be warranted to be properly made, and of good material.

FURNITURE MADE TO ORDER.

Repairing, Boxing, and Packing done in the best manner, and on the most reasonable terms.

Any one can understand that the CASH SYSTEM does not require large profits to make up losses by bad debts, and those who wish by paying cash to obtain a good article, and save from 20 to 50 per cent., are respectfully invited to give me a call.

A. & J. KEOGH,

Piano Forte Manufacturers,

NOS. 257, 259 and 261 WASHINGTON STREET,

Between North and South Division Streets.

The subscribers keep constantly on hand an extensive and choice assortment of Piano Fortes, in elegant Rosewood Cases, which we warrant to be equal in tone, touch and finish, to any manufactured in this country. As a proof of the superiority of our instruments, the subscribers would respectfully call the attention of the public to the subjoined testimonial from Professor Gottschalk, (one of the most distinguished pianists in this country,) being one of the many they are daily receiving from professors and others, assuring them of the merits of their Pianos. Persons desirous of obtaining a superior instrument are earnestly invited to give us a call. Dealers supplied on liberal terms.

A. & J. KEOGH.

TESTIMONIAL.

SARATOGA, 27th July, 1856.

I was excessively satisfied with the piano which Mr. Richard Owen, of Quebec, was kind enough to lend me for my concert here.

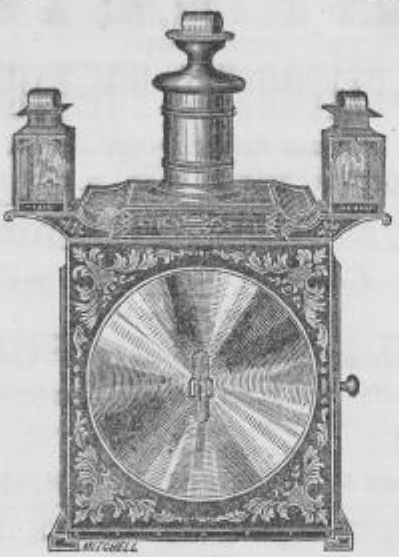

That instrument, of the manufacture of Messrs. A. & J. Keogh, of Buffalo, was one of the most powerful, if not the most powerful, two stringed square Pianos I had ever met with. The tone was full and round, without harshness, and of a remarkable evenness in all its registers. As to its strength, I will merely state the fact, that it stood at my concert during two hours, without intermission, under five or six heavy fantasias, and as many small pieces, in a moist and hot atmosphere, without one single string breaking, or the instrument getting out of tune; which is more than I could say of many grand pianos, even of the most eminent makers.

The Messrs. Keogh are personally unknown to me, and this was the first instrument of theirs I had ever performed on; my opinion, therefore cannot be influenced by partiality. In recommending it, I simply respond to an artistic feeling, and a desire to do justice to manufacturers whose popularity is so well deserved.

Would call the attention of the public to his Revolving Clothes Dryers, which posesses the following advantages over any other mode of drying clothes. Its rotary motion produces a circulation of air, causing the clothes to dry rapidly, and prevents the liability of their being torn. The labor and time in hanging up the articles to be dried and of taking them down are materially lessened.

It occupies but little space, and may be set up in any yard, however small, without inconvenience. The machine will be found to give entire satisfaction wherever it is used, and no family should be without one.

PHOTOGRAPHS

AMBROTYPES, DAGUERREOTYPES.

Plain Photographs of all sizes and prices to suit the most fastidious.

Photographs executed in India Ink to equal the most finished engraving.
Photographs in India Ink, and beautifully tinted in Water Colors.
Photographs painted on Canvas, either Cabinet or Life Size.

These pictures surpass any other portrait ever produced, both in point and finish as well as in truthfulness to nature. Portraits produced by the Photographic process do away entirely with those long and tedious settings which are so much dreaded in obtaining a likeness by the old method, and securing at the same time a more perfect picture.

Persons residing at a distance, having pictures, either of living or deceased friends, can have a perfect Life-size Photograph painted in oil on canvas, by sending the picture with a description of the person giving the general complexion, color of the eyes and hair. By the Photographic process, there is no possibility of a failure in reproducing a perfect fac-simile of the original picture, no matter how small.

From my long experience in this line of portraiture, I feel confidence in saying to the public that in case of any picture failing to give satisfaction, I alone will be the loser.

The public generally suppose that a Photograph is different from the old style of oil painting,—this is not the case; the "Photograph assists the artist in preserving the features," thereby rendering a failure impossible, and the picture equals, if not exceeds, those produced by the old method.

The pictures produced at this Gallery are pronounced by connoiseurs in the art, to be superior to any in this State.

PHOTOGRAPHS COLORED IN OIL CONSIDERED THE ULTIMATUM OF PORTRAITURE!

Superior Ambrotypes taken at this gallery, in Cases, from 50 Cents to 12 Dollars.

The largest Establishment of the kind west of New York.

The pictures to which we were awarded the Diploma and Medal at the World's Fair in London in 1851, are on exhibition at this Gallery. Awarded at the State Fair in 1855, a Gold Medal for the best Photograph in Oil, Water and India Ink; also, at the State Fair in Buffalo, the first premium for Photographs and Ambrotypes.
